

**DID YOU**

**KNOW?**

**TapcoEnpro has been  
Designing and Manufacturing  
Tight Shut-Off Catalyst Slide  
Valves for over 45 years!**

## Catalyst Withdrawal Valves

**Our Catalyst Withdrawal Valves are designed to solve a specific industry problem;  
*Severe Applications Including High Temperatures and High Erosion.***

**The benefits of our Catalyst Withdrawal Valve System include:**

- Reduction in thermal shock distortion
- Precise catalyst throttle control and or shut off function
- Reduced risk of human error by installing an automated system
- Extended wear control with hard-facing weld overlay
- Reduction in leakage with tighter seals
- Replaceable internal parts without removing valve from the line
