

# DESIGNED SPECIFICALLY WITH YOUR SAFETY IN MIND

## FCC Slide Valve Safe Access Device

### Industry Challenges to Solve

- Hazardous work environment for technicians removing and installing FCC Slide Valve Internal components.
- Installation and maintenance of equipment must be performed by qualified mechanics / technicians / maintenance personnel
- The weight of a disc and other components can cause serious injury or damage if accidentally dropped or mishandled during installation.

### Industry Challenges Solved

TapcoEnpro's Onsite Service Group is the standard for in-refinery valve and actuator service. Our Service Division handles the needs of customers throughout the world with the ability and knowledge to perform a complete valve overhaul in the field with an emphasis on Safety, Quality and On Time Completion.

As part of our ongoing Proactive Safety Program, TapcoEnpro has implemented our **Onsite Personnel Safe Access Device** policy and procedure to ensure no person is put in harm's way during turnarounds or valve maintenance.
